PROFESSIONAL SUMMARY

Highly accomplished Senior Full-Stack Software Developer with over 20 years of expertise engineering, architecting, and maintaining enterprise-grade web applications and high-frequency transactional backends. Specialized in PHP (Laravel, CodeIgniter), JavaScript/Node.js, React.js, Java Spring Boot, and cloud environments. Advanced proficiency in AI-assisted software engineering and Prompt Engineering, leveraging next-generation LLM pipelines (ChatGPT, Claude, Gemini, DeepSeek, Perplexity, Lovable) to drive rapid prototyping, optimize database querying, and produce robust automated unit test suites. Proven track record of delivering resilient cloud microservices, high-performance REST/GraphQL APIs, and end-to-end full-stack architectures within continuous-integration environments.

CORE TECHNICAL SKILLS

Programming Languages	PHP, JavaScript, Node.js, Java, SQL, GraphQL, HTML5, CSS3
Frameworks & Libraries	Laravel, React.js, Java Spring Boot, CodeIgniter, CakePHP, Express.js, FastAPI
Cloud & Databases	AWS EC2 Linux, PostgreSQL, MySQL, MS SQL Server, Vercel, GoDaddy Hosting
AI & Productivity Tools	ChatGPT, Claude, Gemini, Perplexity AI, DeepSeek, Lovable, Canva, Stable Diffusion, Prompt Engineering, AI-Assisted Development, LLMs
API & Integration	RESTful APIs, GraphQL APIs, Microservices, Postman, JMeter, Git, GitHub
SDLC & Methodologies	Agile, Scrum, CI/CD Workflows, System Architecture, Code Optimization

TECHNICAL EXPERIENCE

Software Developer (Team Member)

Mar 2025 – Present

Agropreneurs Market Technologies Pvt. Ltd.

- Maintain, debug, and optimize a high-scale proprietary in-house product built on AWS Amplify, ensuring seamless cloud hosting and backend scalability.
- Develop clean, reusable user interface components using React.js and engineer scalable backend services leveraging Node.js.
- Design and optimize high-performance GraphQL APIs for fast, complex data queries, decreasing data loading overhead across platform dashboards.
- Integrate advanced AI-assisted development tools and Prompt Engineering techniques across Claude, Gemini, and DeepSeek to accelerate feature prototyping, automate unit testing, and optimize code generation.
- Collaborate closely within a continuous-delivery Agile engineering team to troubleshoot platform anomalies and implement robust application updates.

Senior Technical Developer / Architect

Jan 2023 – Feb 2025

Qolaris Data India PVT. LTD.

- Architected and deployed 'PropertiesAt', a multi-tenant property search web application utilizing full-stack Laravel, React.js, PostgreSQL, and Vercel, featuring a comprehensive Admin Dashboard and interactive Map API integrations.
- Developed an automated, secure Alumni Portal web application using full-stack Laravel within an accelerated 7-day sprint via advanced AI prompt orchestration and LLM workflow modeling.

- Leveraged advanced AI tools including ChatGPT, Claude, Perplexity, Lovable, and DeepSeek for high-velocity code generation, debugging, automated documentation, database schema optimization, and structural architecture discussions.
- Applied advanced Prompt Engineering techniques to streamline backend workflows, generate optimized REST APIs, and create extensive automated unit test cases, reducing overall feature development effort by 30%.
- Designed and engineered scalable application backends and robust REST APIs for a distributed School Management System, an interactive eLearning platform, and an enterprise Human Resource Management System (HRMS).
- Conducted complete functional and structural code refactoring to improve query latencies and application runtime efficiency by 25%.

Lead Full-Stack Developer

Apr 2021 – Dec 2022

Eastern India Technosoft PVT. LTD.

- Architected the application backend and microservices architecture for the 'Sahaj Bolobolo' mobile application using Java Spring Boot and MySQL, ensuring high concurrency and sub-second response latencies.
- Developed, reviewed, and optimized secure enterprise Java REST APIs for a large-scale Legal Application, standardizing code quality and enforcing strict secure-coding compliance.
- Collaborated within Agile/Scrum sprints to resolve system bottlenecks and streamline deployment pipelines, delivering scheduled product updates with a 95% on-time release rate.
- Created structural technical architecture blueprints and technical documentation detailing relational schema rules and endpoint parameters.

Senior Software Engineer

Feb 2020 – Mar 2021

Ambrossia Infotech Solutions PVT. LTD.

- Engineered scalable database structures and optimized complex queries on relational systems (MySQL, MS SQL Server) to support high-traffic web applications.
- Supervised daily software engineering tracks, executed thorough code reviews, and managed continuous automated testing suites using Jira, Postman, and JMeter.
- Designed system component specifications, system requirement baselines, and application logic integrations aligned with modern security parameters.

Senior Developer / Technical Lead

May 2014 – Jan 2020

Matrix Media Solutions PVT. LTD.

- Coded and delivered open-source software solutions across complex Laravel, CodeIgniter, CakePHP, and WordPress ecosystems for over 40 distinct client accounts.
- Personally coded and delivered a highly secure Java microservice for store.successlife.com, facilitating smooth Ethereum blockchain transactions and PayPal wallet integrations.
- Provided technical leadership, query optimization, and performance-tuning for relational databases (MySQL, MS SQL Server) to sustain high traffic volumes.

Software Engineer

Jan 2004 – Apr 2014

Elegant Systems Powerweb PVT. LTD.

- Engineered and maintained a diverse array of enterprise web systems using PHP, ASP, JSP, and MySQL database backends.
- Developed and deployed an enterprise Lead Management System for Beliteweight (US), significantly enhancing data security and operational throughput.
- Designed and built an automated Booking Management System for Green Deal (UK), tracking regulatory energy efficiency audits and green certifications.
- Programmed a distributed, high-availability Prepaid Sales-chain Management System for Hutchison Essar South telecom networks, managing complex relational transactional flows.

EDUCATION & CREDENTIALS

Master of Computer Applications (MCA) – Sikkim Manipal University (Distance Learning)	2008
Bachelor of Science (B.Sc.) in Chemistry – Barkatullah University, Bhopal	2001
Senior Secondary Examination (Science) – Kendriya Vidyalaya No.1, O.F. Itarsi	1996
AI Tools Certification (Claude, Gemini, ChatGPT, Perplexity, DeepSeek, Canva, Stable Diffusion, Jasper AI) – Coursiv	2026
Scrum Fundamental Certified (SFC) – SCRUMstudy	2021
